1 [Query term disambiguation for Web cross-language information retrieval using a search engine](#)

Akira Maeda, Fatiha Sadat, Masatoshi Yoshikawa, Shunsuke Uemura

November 2000 **Proceedings of the fifth international workshop on on Information retrieval with Asian languages**Full text available: [pdf\(736.31 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

With the worldwide growth of the Internet, research on Cross-Language Information Retrieval (CLIR) is being paid much attention. Existing CLIR approaches based on query translation require parallel corpora or comparable corpora for the disambiguation of translated query terms. However, those natural language resources are not readily available. In this paper, we propose a disambiguation method for dictionary-based query translation that is independent of the availability of such scarce langua ...

Keywords: WWW, cross-language information retrieval, mutual information, search engine

2 [An intelligent multilingual information browsing and retrieval system using information extraction](#)

Chinatsu Aone, Nicholas Charocopos, James Gorlinsky

March 1997 **Proceedings of the fifth conference on Applied natural language processing**Full text available: [pdf\(1.10 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)
[Publisher Site](#)

In this paper, we describe our multilingual (or cross-linguistic) information browsing and retrieval system, which is aimed at monolingual users who are interested in information from multiple language sources. The system takes advantage of *information extraction* (IE) technology in novel ways to improve the accuracy of cross-linguistic retrieval and to provide innovative methods for browsing and exploring multilingual document collections. The system indexes texts in different languages (...
